

Supporting Sustainable Businesses

As the need to accelerate progress towards net-zero, support biodiversity and adapt to climate change, we can help you to identify carbon mitigation measures throughout your value chain or enhance natural capital assets and support ecosystem services, we can help. We can provide valuable insight and practical solutions to develop and strengthen sustainability credentials for your business.

Whether you are looking to identify carbon mitigation measures throughout your value chain or enhance natural capital assets and support ecosystem services, we can help. We can provide valuable insight and practical solutions to develop and strengthen sustainability credentials for your business.

We have the right mix of consultants, specialists, and researchers to provide an accessible and responsive, yet rigorous and comprehensive, blend of advice and practical services.

Our services include:

- Life cycle analysis and carbon management plans
- Environmental, social, and corporate governance (ESG), including carbon credits and value chain initiatives
- Natural capital assessments
- Biodiversity analysis and advice
- Drone mapping
- Our Verification and Validation Service as part of the IUCN Peatland Code
- Employee engagement with net-zero via Carbon Literacy Training

Environmental credentials are becoming more important to consumers, suppliers, and investors. All sectors are under pressure to minimise environmental, ethical, and social impacts from their activities. Enhancing and demonstrating your environmental credentials could drive efficiencies, build resilience, help to comply with current or future environmental regulations and science-based reporting targets, and attract a more environmentally aware customer base.

The environment team brings together a wide range of experience across both SAC Consulting and wider SRUC. We draw on the practical and local knowledge of our network of farm advisors, to specialist carbon and ecology consultants and scientific researchers, bringing together an unrivalled level of
